

In [1]: `pip install requests`

Defaulting to user installation because normal site-packages is not writeable
Requirement already satisfied: requests in c:\programdata\anaconda3\lib\site-packages (2.31.0)
Requirement already satisfied: charset-normalizer<4,>=2 in c:\programdata\anaconda3\lib\site-packages (from requests) (2.0.4)
Requirement already satisfied: idna<4,>=2.5 in c:\programdata\anaconda3\lib\site-packages (from requests) (3.4)
Requirement already satisfied: urllib3<3,>=1.21.1 in c:\programdata\anaconda3\lib\site-packages (from requests) (1.26.16)
Requirement already satisfied: certifi>=2017.4.17 in c:\programdata\anaconda3\lib\site-packages (from requests) (2023.7.22)
Note: you may need to restart the kernel to use updated packages.

In [2]: `import random`

```
In [*]: def venkat_chat(user_input):
    if user_input in ["Hi", "Hello", "Greetings"]:
        return "Hi there! How can I help you today?"
    elif user_input == "How are you?":
        return "I'm doing well, thank you for asking."
    elif user_input == "What can you do for me?":
        return "I can help you with various tasks, like answering your questions,"
    elif user_input == "See you soon":
        return "See you soon too!"
    else:
        return "Sorry, I don't understand your request."

def main():
